Section 106

Planning Regions

By 7/1/15, in order for the state to receive funds and as part of the process for developing a state plan, a state shall identify regions in the state after consultation with local boards and chief elected officials in the local areas and consistent with considerations of:

- Labor market areas
- Regional economic development areas
- Available resources including appropriate education and training providers

Types of Regions

- 1 local area this is aligned with the region
- 2 or more local areas that are collectively aligned
- Interstate areas contained within 2 or more states

Regional Coordination

The local boards and chief elected officials in each planning region shall engage in a regional planning process that results in:

- Prepare a regional plan
- Establish regional service strategies
- Develop and implement sector strategies
- Collect and analyze regional labor market data
- Establish administrative cost arrangements
- Coordinate transportation and other supportive services
- Coordinate services with regional economic development services
- Establish an agreement concerning how the planning region will collectively negotiate and reach agreement on local levels of performance and report on performance accountability measures
